1. Purpose of the Meeting
   1.1. This was the 9th meeting of the East Campus Open Space Framework Committee. The purpose of the meeting was to review the implications of the UO/Longhouse Framework Agreement regarding the view corridor and Open Space requirements associated with the ECRH.
   1.2. Copies of the graphic information presented at the meeting are attached.

2. Update from Gregg Lobisser
   2.1. The University has come to an initial framework agreement with the Native American Tribes and the request for a view corridor from the Longhouse.
   2.2. The ECRH has been shortened in the north/south direction by approximately 28 feet. The south edge of the project has been moved north to allow for a 60’ view corridor to extend east from the Longhouse door. This 60’ corridor will be an ‘expression place’ for art of the Native American Tribes.
   2.3. The Campus Planning Committee is scheduled to meet on February 4th from 1-3 PM. The Open Space and ECRH Schematic Design will be presented at the meeting.
   2.4. Dave Hubin will chair this meeting.

3. Open Space
   3.1. Mark Foster presented the attached open space diagrams. Only minor modifications to these diagrams were suggested. The diagrams will be revised and reviewed/approved prior to the CPC meeting.
   3.2. Discussion occurred as to whether the student recycling areas on the west side of the ECRH were appropriate and allowed use for open space areas. It was determined that they were in conflict with the allowed uses and should be relocated from the 60’ open space or the open space should be narrowed. After the meeting ZGF met with Allen Gidley and Gregg Lobisser and agreed that the recycling areas could be moved to the courtyards. ZGF will revise the design for the CPC meeting. The 60’ open space from the Museum and ECRH will be presented to the CPC.

4. Next Open Space meeting to be determined.
