

## University of Oregon – Lewis Integrative Science Building

### Programming Phase – Informatics Visioning Session

When: Thursday, February 5, 1:30 – 3:00 PM  
Where: Willamette 350

#### AGENDA

##### Objectives

- To explore the role (and possible roles) of computational science and informatics in the science community at the University of Oregon
- To develop a common vision for how computational science and informatics can serve as the glue between the scientific disciplines housed in the Lewis Integrative Science Building

##### Agenda

- Introductions
- Brief overview of LISB program
- Focused review of current Informatics program components
- Overview of proposed project site and possible building organizations.
- Group discussion:
  - Consider Informatics in the context of an Integrative Science Campus
  - Discuss how computational science and informatics can best serve the various departments.
  
  - Degree of decentralization
  - How to create an Informatics community
  - How to get people talking to each other
  - \* Consider visualization lab and help desk

##### Products

- Meeting Notes
- Vision statement and project goals for Informatics
