WHAT WE HEARD AT THE LAST CPC MEETING:

These were items for the Campus Planning Committee’s review and action:

1. Refine the design of the covered bike parking facilities
2. Refine the design of additional built landscape features (e.g. seatwalls, stormwater planters, etc.) if any.
3. Carefully consider the design and materials for the Craft Center Courtyard outer fencing to ensure it is not “prison-like” in appearance. Consider materials other than metal mesh that are more consistent with other applications on campus, for example vertical metal fencing (similar to historic applications, e.g., at Dad’s Gates and modern applications, e.g., at Powell Plaza), particularly for areas in public view.

These items were modified since June and need the committee’s review and action:

1. Relocated the US flagpole in the vicinity of its current location at the Amphitheater.
2. Changed the size, proportion and roof coverage of the Craft Center’s outdoor courtyard.
