FOOD SERVICE DESIGN
DESIGN CRITERIA FOR FISHBOWL

1. Open views in and out of windows
2. Variation in height of seating
3. Create edges and protected spaces
4. Flexibility of furniture types
5. Respect historic elements in space
Seated height counter along North window for individual seating and direct outdoor views.
One sided banquettes create a natural separation between queuing/traffic flow and seating. One sided banquettes offer the greatest amount of flexibility.
Built in bar height counter creates a variation in height, offers views toward the outside and create an edge or protected space for more table seating.
Small tables can be pushed together or pulled apart to make different sized seating groups.
