Future Music Oregon is dedicated to the exploration of sound and its creation, and to the innovative use of computers and other recent technologies to create expressive music and media compositions. To this end we embrace our roles as both a focus of educational and creative pursuits. Student composers working in the FMO studios have been tremendously successful having their work presented at national and international experimental music and new media festivals. In addition to establishing a creative and intellectually stimulating environment for education, FMO sponsors a concert series featuring new electroacoustic music. Past guest artists have included noted composers of electroacoustic music such as Allen Strange, Carla Scaletti, Barry Truax, Dennis Miller, Chris Chafe, Jim Sain, Gary Lee Nelson, Mark Applebaum, James Dashow, Russell Pinkston, Eric Chasalow, Brian Belet, Peter Terry and Gioacchino Rossini.

105th Season, 71st program
**PROGRAM**

**Guelaguetza (1995, revised 2005)**

Carl Stone

***

**PROGRAM NOTES**

**Guelaguetza** was composed in May of 1996 and was commissioned by the Bay Area Composers Forum (San Francisco) for an event entitled The Garden of Memory, which took place within the Chapel of the Chimes, a mausoleum/crematorium designed by Julia Morgan in the 1930's, in Oakland California. The work is approximately one hour in length. Although the overall form is fixed, the sound details are largely improvised. In its original version I relied on an external sample-player in order to perform the piece. These days, Guelaguetza is performed live using only the direct output of a Macintosh Powerbook computer. In recent versions I occasionally have added a new layer, namely found/appropriated video material, which lies unmanipulated on top of the music.
