

Ebey's Landing

National Historic Reserve Visitor Center

Adam Stephen

ARCH 484 Peter Keyes Fall 2009

Perspective from North main and 9th Street

Our site is at the corner of Front Street and North Main Street. The Haller House was built in 1866. It is adjacent to the downtown area and the historical warf. The site runs from the Haller House up the hill to 9th street. I'm proposing that a public outdoor plaza be placed on the site, along with a visitors center for the National Historic Reserve. 9th street will support a small cafe or bakery, and a false front building that ties into the other shops on Front Street.

Historic Haller House

Elevation

Granville Haller House

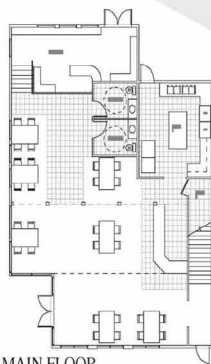

MAIN FLOOR
SCALE: 1/8" = 1'-0"

The existing Haller House is going to be kept as is. The house was built in 1866. It is one of the oldest homes in Coupeville and needs to remain that way. It serves as a window into the past. The new visitor center will utilize the existing rooms. The upstairs rooms will be used as office space for the historic reserve officials. The lower floors will provide display rooms that reflect the history of Coupeville and provide information on the area, along with a media room and a meeting room. The bathroom under the stairs will remain untouched as well, to illustrate how the space was previously used.
