

**PSYCHOLOGY 611**  
**DATA ANALYSIS I - FALL 2008**  
**143 Straub Tues. & Thurs. 10:00 - 11:20**

<b>Professor:</b>	<b>Teaching Assistant:</b>
Dr. Lou Moses	Amber Gayle Thalmayer
Phone: 346-4918	346-4930
Office: 397 Straub and 137 Straub	351 Straub
Office Hours (137 Straub): M 10-12, W 1:30-3:30	Friday 12-2
E-mail: moses@uoregon.edu	athalmay@uoregon.edu

**Course Description:** This course is the first in a 3-term sequence of classes designed to provide a thorough grounding in statistical concepts, methods, and applications of relevance to psychological science. The aim of the course is to help students develop skills in the analysis and interpretation of real psychological data. Our focus will be conceptual rather than mathematical (e.g., it is more important to understand why a particular statistical technique is appropriate, and how to make sense of the results obtained from its use, than to understand the full mathematical underpinnings of the statistic). During the course we will make heavy use of the computer, although you will also be asked to carry out hand computations illustrating key statistical principles.

**Required Textbook:** Howell, D.C. (2007). Statistical Methods for Psychology (6<sup>th</sup> Ed.). Belmont, CA: Thomson Wadsworth.

**Lectures and Laboratories:** A list of lecture topics and reading assignments can be found on the following page. Lecture notes will be available on the course Blackboard web site (see below) prior to the relevant lectures. Please bring these notes to class. The course labs will be held each Friday (10-11 or 11-12) in 180 Straub. The labs will provide an opportunity to gain hands-on computing experience illustrating concepts discussed in lectures. They will also involve discussion of the weekly problem sets and reviews prior to exams, as well as allowing you the chance to raise any questions you have concerning lectures or the textbook.

**Software:** In this course we will be using SPSS software (version 16). The software is installed on the PCs in 180 Straub. The lab is open 8am-9pm Monday to Thursday, and 8-5 Friday, and is available for use when classes are not held (access the class schedule via: <http://psychweb.uoregon.edu/calendar/calendar.htm>). Students may also access the software through the Social Science Instructional Laboratories (SSIL) in McKenzie Hall (there is a fee of \$20 per term). If desired, students can purchase their own copy of SPSS from the Bookstore. Be sure your computer is powerful enough to run it, and be sure to get the right version: SPSS Graduate Pack, not the scaled down SPSS student version. The price of the software is about \$200.

**Exams:** There will be two exams: an in-class midterm and a take-home final. Exams will be cumulative, with an emphasis on more recent material. Exams will be open book. It will be helpful to have a calculator for the exams but to receive credit for calculation problems you will need to show each step of your calculations; do not rely on an advanced calculator in using complex formulas.

**Problem Sets:** Problem sets will be assigned each week. Normally, the problem sets will be handed out on the Tuesday (thus giving you the opportunity to try them before the Friday lab) and will be due by email at 10am the following Tuesday. The problem sets will be graded on a 10-point scale. Collaborative learning is encouraged: If you want to discuss the problems with other students, feel free to do so. However, the answers you turn in must be written independently. If you have difficulties with the problems, please consult with Amber or me.

**Grading:** The problem sets will count for 35% of your grade, the midterm for 30%, and the final for 35%. Problem sets and exams will be graded by a teaching assistant using explicit criteria that I will provide. The teaching assistant has taken this course previously and performed at a superior level. If anyone has concerns about their work being graded by a fellow graduate student, please see me and we can consider alternative arrangements.

**Blackboard:** The course web site can be accessed through the Blackboard course information system. On the web site, you will find general announcements for the class, lecture notes, problem sets and solutions, links to relevant web sites, and more. To visit the course site, go to <http://blackboard.uoregon.edu>, login, and then select "PSY 611" from the list of blackboard course sites in which you are enrolled. If you are having difficulty accessing Blackboard see <http://libweb.uoregon.edu/systems/kirc/blackboard.html> .

### OUTLINE OF LECTURE TOPICS

Date	Topic	Reading
Sept 30- Oct 2	Exploratory Data Analysis	Chs 1 & 2
Oct 7-9	Distributions	Chs 3, 4, 7.1 & 7.2
Oct 14-23	Hypothesis Testing & Estimation: T Tests	Chs 7 & 8
Oct 28-30	One-Way Analysis of Variance	Ch. 11
Nov 4	Contrasts	Ch. 12
Nov 6	MIDTERM	
Nov 11-13	Two-Way Analysis of Variance	Ch. 13 (except 13.12 & 13.13)
Nov 18-25	Correlation & Regression	Chs 9 & 10 (except 10.4 & 10.5)
Nov 27	Thanksgiving	
Dec 2-4	Analysis of Categorical Data	Chs 5, 6, 10.4, & 10.5
Dec 10	TAKE HOME FINAL EXAM DUE AT 9AM
