

# Data Analysis II

Psy 612  
CRN 24571  
Winter 2008  
1000-1120 UH  
PLC 189

## Instructor:

Robert Mauro  
311 Straub  
[mauro@uoregon.edu](mailto:mauro@uoregon.edu)  
346-4917

Office Hours: UH 1300-1400 & by appt.

## Teaching Assistants:

Steve Guglielmo  
391 Straub  
[sgugliel@uoregon.edu](mailto:sgugliel@uoregon.edu)  
346-3942

Office Hours: W 1000-1200

Amber Thalmayer  
351 Straub  
[athalmay@uoregon.edu](mailto:athalmay@uoregon.edu)  
346-4930

Office Hours: M 1200-1300 BB Virtual Chat  
U 1400-1500 office

## Laboratory

180 Straub CRN: 24572, 24573 F 10-1120; 1130-1250

## Course Information

This is the second course in a three course graduate level data analysis sequence. This course is devoted to topics in multiple regression with special emphasis on complex analysis of variance and experimental design. It is assumed that all students have successfully completed Psy 611 (Data Analysis I) or equivalent. In general, the text chapters listed in the syllabus cover the material planned for class on the day that they are assigned and provide more in depth coverage of some of the issues.

### Inclement Weather Policy

If Eugene School District 4J cancels (not delays) school, we will cancel class. Nothing we do in this class can't wait until its safe to travel.

## Texts:

- Pedhazur, E. J. (1997). Multiple Regression in Behavioral Research (3rd Ed.). Harcourt Brace: San Diego, CA.
- Keppel, G. & Wickens, T. (2004). Design and Analysis: A Researcher's Handbook. Prentice Hall: Upper Saddle River, NJ.

Class notes available on Blackboard

## Other Useful Books:

### Analysis of Variance & Experimental Design

- Hays, W. L. (1994). Statistics (5th ed). Harcourt Brace College Publishers: Fort Worth.
- Tamhane, A., & Dunlop, D. (2000). Statistics and Data Analysis. Prentice Hall: Upper Saddle River, NJ.
- Winer, B. J. (1971). Statistical principles in experimental design (2d ed). McGraw-Hill: New York.

### Multiple Regression & Related Issues

- Cohen, J. & Cohen, P. (1983). Applied multiple regression/correlation analysis for the behavioral sciences. Lawrence Erlbaum Associates: Hillsdale, N.J.
- Wonnacott, R. & Wonnacott, T. (1970). Econometrics. J. Wiley: New York.

### Conducting Empirical Research

- Abelson, R. (1995). Statistics as Principled Argument. Lawrence Erlbaum: Hillsdale, N.J.

## Class Requirements:

Complete take-home midterm (35% of grade), final (50% of grade), and weekly homework assignments (15%) of grade (see [guidelines](#)). Homework will be assigned and due each Thursday. The laboratory section may have additional assignments.

# Syllabus

## Complex Analysis of Variance

1/8	Representation of Experimental Designs	
1/10	Factorial Analysis of Variance	K&W 10-13
1/15	Random Factor Models & Quasi-F's	K&W 24
1/17	Nested Designs	K&W 25
1/22	Repeated Measures and Randomized Blocks	K&W 16-20
1/24		

## Multiple Linear Regression

1/29	Basic Multiple Regression	P 5
1/31	Introduction to Matrix Algebra	P 6 <b>MIDTERM OUT</b>
2/5	Advanced Topics in Multiple Linear Regression	P 7-8
2/7	Partitioning variance	p 9-10 <b>MIDTERM DUE @ 1000</b>
2/12	Regression with categorical variables	P 11-12
2/14	Trend analysis	P 13
2/19	Missing Data and Nonorthogonal Designs	K&W 14
2/21	Analysis of covariance	K&W 15, P 14-15
2/26	Heteroscedasticity	
2/28	Autocorrelation	
3/4	Repeated Measures ANCOVA	
3/6	Multilevel analysis	P16
3/11	Categorical Dependent variables	P 17
3/13		<b>FINAL OUT</b>
3/21	<b>FINAL DUE 8:00 AM</b> by e-mail to <a href="mailto:sgugliel@uoregon.edu">sgugliel@uoregon.edu</a>	

P: Pedhazur;  
K&W: Keppel & Wickens
