Text:

Gazzaniga, Heatherton, & Halpern. Psychological Science 3rd Ed.

Course Overview

In this course, we survey the history of modern psychology as well as the neural and psychological basis of motivation, perception, attention, learning, and memory. Mind and Brain together with Mind and Society (PSY202), which emphasizes development, personality, abnormal and social psychology, create a two-term introduction to psychology.

Course Philosophy and Expectations

The course includes daily, traditional class meetings. Attendance in class is an essential part of your success in this course. Topics will be covered during class that are not in the textbook. In addition to lecture we will have several non-graded (pass/fail) activities that make up part of your grade. You are responsible for all material, (e.g., exams will cover all material from readings, lecture, activities, etc). Doing well in this class requires a proactive involvement with the course content. This includes completing the daily reading assignments, showing up for class, completing the activities and engaging in discussion.

As a 4-credit class, you are expected to spend 16 hours per week outside of class working on relevant material. It is also expected that you will come to class having done the readings for the day prior to coming to class. You will not do well on exams and writing exercises if you do not keep up with the reading. We also recommend that you check your UO email and Blackboard daily, because all important information will be disseminated this way. This course has been designed to comply with the psychology department's guidelines for teaching and learning. Please review these guidelines at

Classroom Etiquette

A small minority of students in some classes believes they are invisible, that they are not noticed, and that one person's behavior does affect the majority around them. Not true! Just as actively engaged students have a positive influence on the classroom environment, even a activities like continued talking to your neighbor, texting, coming late, leaving early, personal grooming, reading a newspaper, sleeping, or cell phone use (very bad!) are extremely

disruptive. PLEASE make sure that you and your fellow students get your money's worth out of this course and simply abstain from such activities. You can make a difference by listening attentively, by asking questions, and by contributing to discussions. I will make every effort to facilitate classroom interactions and I promise that each and every question will be addressed.

Academic Honesty

Academic honesty is very important and academic dishonesty is a very serious matter that carries long-term, severe penalties. In accordance with the University of Oregon Student Code of Conduct OAR 571-021-0105 (3) "Cheating" means any act of deception by which a student misrepresents or misleadingly demonstrates that he or she has mastered information on an academic exercise that he or she has not mastered. Examples include but are not limited to: (a) Giving or receiving unauthorized help in an academic exercise; (b) Use of sources or resources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments; (c) Acquisition, without permission, of tests or other academic material belonging to a member of the University faculty or staff; and (d) Engaging in any behavior specifically prohibited by a faculty member in the course syllabus or class discussion. (26) "Plagiarism" means using the ideas or writings of another as one's own. It includes, but is not limited to: (a) The use, by paraphrase or direct quotation, of the published or unpublished work of another person without full and clear acknowledgement; and (b) the unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials.

The instructor may in some cases also submit your work to SafeAssign or some other plagiarism analysis and detection program. By enrolling in this course you grant the instructor permission to do so. If you are ever unsure about whether a behavior constitutes cheating, please ask the teaching assistant or me. It would also be wise to read the university's policy on academic dishonesty at the Office of Student Life homepage.

Grading

Exams (50% of total grade): Each Friday (starting June 26th) and each following Friday we will have a brief multiple-choice exam covering material from the preceding week's lessons. The last Friday of (July 17th) we will have a double exam, which is the regular weekly exam plus one additional comprehensive exam covering the entire course. In total, there will be 4 regular exams and 1 comprehensive exam. Each exam counts 10% of the total exam grade. Exam scores will be curved with regard to the distribution of scores for that exam in the entire class. Curving will proceed in roughly the following manner: The top 15% of scores will receive an A (90-100 points), the next 25% will receive a B (80-89 points), the next 30% will receive a C (70-79 points), the next 10% will receive a D (60-69 points, the remaining scores will receive an F (0-59 points).

Intermediate quizzes (20% of total grade): At various times during the class meetings or on Blackboard there will be quiz questions. The primary purpose is for the quizzes is to be a self-test of your progress to shape class discussion and your personal studying. The intermediate quizzes will be graded on a pass/fail basis.

Activities (20% of total grade): Starting in the first week of class, there will be activities and demonstrations relevant to classroom concepts. There will be one activity each week grades on a 4 points scale corresponding to no pass/unacceptable/acceptable/excellent.

Essay responses (5% of total grade): There will be several short answer essay assignments throughout the session. The purpose is to provoke deeper thought regarding class and reading material.

Research Participation (5% of total grade): In order to receive credit for this course, you will have to participate in 4.5 credits offered through the Department of Psychology. Most experiments take one hour or less. Your participation contributes to scientific knowledge and gives you hands-on experience in the process of psychological research. After each study you participate in you can take an online quiz about methodological and theoretical aspects of that experiment. You only have to do two such quizzes in total to ensure a maximum score. This means that you need to do at least two different studies, no matter how long each one takes. The quizzes will be posted on the Blackboard course site around the second week of class (see "Assignment: RER Quizzes"). There will be one quiz for each study you participate in (i.e., for the first study click on "Experiment Quiz 1"). For each of the two quizzes you can get a maximum of 50 points.

Failure to complete the experiments or alternative assignment will result in an "Incomplete" grade for this class. In order to have this Incomplete changed to the grade you earned in this class, the missing experiments have to be completed *within one quarter* of the end of this class. After that time, incomplete grades will be changed to no pass. For experiments you did not complete during the class term, there will be no opportunity for participating in graded RER quizzes. To avoid an incomplete, please begin early in the term with the experiments. In the past, students who began late have often encountered scheduling problem and sometimes have been unable to do all the experiments.

You can sign up for experiments online. To do this, go to www.uoregon.edu/~hscoord/

Students who do not wish to participate in experiments have the option of writing a research paper instead. This paper needs to integrate information from four different published journal papers provided through me. If you wish to pursue this option, you must contact me during the first week of class.

Grading:

5% - Research participation

5% - Essay responses

20% - Intermediate guizzes

20% - Activities

50% - Exams

Outside-Classroom Contact:

One way to work against the class anonymity is by establishing direct contact outside class. If you have any issue, question, or comments please do not hesitate to come to my office during office hours or any other time as long as you email in advance.

Students with Disabilities:

If you have a documented disability and anticipate needing accommodations in this course, please make arrangements to meet with the instructor soon. Also please request that the Counselor for Students with Disabilities send a letter verifying your disability. [Counselor for Students with Disabilities: Hillary Gerdes, 346-3211, TTY 346-1083, hgerdes@oregon.uoregon.edu]

Tentative Class Schedule

date	<u>topic</u>	<u>reading</u>	<u>activity</u>
Jun 22 M	Introduction, history	Chap 1: Introduction	Short Essay 1
Jun 23 T	HSP Presentation History	Chap 2: methodology	
Jun 24 W	Scientific method	Chap 3: Biology	Assignment 1: Methods
Jun 25 R	Biology	Chap 3: Biology
