

# HUMAN NEUROPSYCHOLOGY (PSY 449/549)

University of Oregon - Fall 2017

TuTh 2:00-3:20pm ♦ Lillis 111 ♦ 4 credits

<http://canvas.uoregon.edu>

**Instructor:** Christina Karns, Ph.D.

**Email:** ckarns@uoregon.edu

**Office:** 179 Lewis Integrative Sciences Building [ring Neville Doorbell at entrance LISB 102]

**Office Hours:** M 9:15-11:15, and by appointment (unavailable Fridays)

**Teaching Assistant:** Ben Nelson

**Email:** bwn@uoregon.edu

**Office:** Straub 494

**Office Hours:** please email requesting an appointment (unavailable Tuesdays)

## Required Reading

- ♦ Sacks, O. (1998). *The Man Who Mistook His Wife for a Hat and Other Clinical Tales*. Touchstone Books. (Available on reserve at Knight Library).
- ♦ All other required readings are available as PDF files on Canvas. A reading list is also posted on Canvas for your reference.

## Optional Reading

- ♦ Gazzaniga, M., Ivry, R.B., & Mangun, G.R. (2013). *Cognitive Neuroscience: The Biology of the Mind*. (4<sup>th</sup> of 5<sup>th</sup> Ed). New York, NY: W. W. Norton & Company. (Available at on reserve at Knight Library)

## Course Overview

This course will examine how studies of neurological disorders and neuroimaging techniques are being used to gain insight into human mental processes, including object recognition, attention, memory, language, emotion, and cognitive control. We will consider dominant theories of the neural underpinnings of these cognitive processes and explore how research on typical and atypical neural processes has led to those theories. In addition to learning about classic research in human neuropsychology and cognitive neuroscience, you will read and critique empirical articles and discover how research in the field is transforming and enhancing our understanding of how the brain gives rise to the mind.

## Learning Outcomes

By the end of this course you should be able to:

- ♦ Identify major theories, research findings, and methodological approaches in cognitive neuroscience;
- ♦ Critically examine research in human neuropsychology/cognitive neuroscience and communicate your ideas clearly and effectively;
- ♦ Evaluate how cognitive neuroscience is reshaping our understanding of the human mind and brain.

## Student Workload

When you complete this course, you will earn 4 credits toward your degree. Four credits are the equivalent of 120 hours of work across the term, or 12 hours per week for 10 weeks. You will spend 3 hours in class each week. The other 9 hours will be spent completing reading assignments, posting on the discussion forum, studying for quizzes and exams, and working on your paper and case study assignments. Most weeks you should plan to spend about 6 hours on reading and quiz preparations since your workload will increase when you are studying for the midterm and the final exam, and when you are working on your written assignments.

## Course Requirements

### Reading Assignments

You should complete the assigned readings **before** coming to class. The reading assignments for Tuesday class sessions will typically consist of background readings (review articles or book chapters) on the week's topic. The reading assignments for Thursday class sessions will typically include chapters from the Sacks book, which sympathetically describe case histories of neurological disorders, and empirical articles, which provide practice reading primary research articles in cognitive neuroscience. I will provide you with questions to guide your reading of the Sacks book and the empirical articles, which we will critically evaluate as a class.

### Discussion Posts

To facilitate class discussion, you will be required to post on the Canvas discussion forum before most Thursday class sessions (see Course Schedule). Your post can be a query, puzzle, or issue about the assigned reading that you would like to have discussed in class, or it can be a response to one of your classmate's posts. **Discussion questions/responses must be submitted on the Canvas discussion forum by 7pm Wednesday, but earlier posts are appreciated and give other students and your instructors a chance to respond to your thoughts.** Your diligence and thoughtfulness in meeting this requirement, along with your regular attendance and participation in class, will count for 10% of your grade in this course. There are no make-ups for missed discussion posts.

### Quizzes

Short quizzes will be given at the beginning of most Tuesday class sessions (see Course Schedule). Quizzes will generally consist of multiple-choice questions that pertain to recently presented course material and the assigned readings. Questions will sometimes be drawn from readings that have been assigned but have not yet been discussed in class (even those due the day of the quiz); however, these questions will be of a more general nature and should be easily answered if you have read the material. Of the seven quizzes, the two with the lowest scores will be dropped, with the average score of the remaining five yielding 15% of your final grade. **No make-up quizzes will be offered;** if you miss a quiz, that grade will be one of the two that will be dropped.

### Exams

There will be one midterm and a final exam, each composed of multiple-choice and short-answer questions. Exam questions will be based on material presented in class and material from the reading assignments, and will require you to go beyond memorization to apply, analyze, and synthesize information. The final exam will not be cumulative. **Make-up exams are not permitted except in documented emergency situations.**

### Case Study

For this assignment, you will select a neuropsychological case study, either from the Sacks book or from an empirical article, and research the neurological basis of the condition described in the case. You will summarize the most salient aspects of the case, describe the neurological basis of the condition along with typical symptoms and treatments, and discuss how the case contributes to our understanding of brain function. Additional information about this assignment will be provided in a separate handout. **The case study assignment is due on Canvas on Friday, NOVEMBER 17.** Late assignments will be penalized one letter grade per day late, in fairness to those who submit on time.

### Literature Critique Paper (Undergraduate students enrolled in PSY 449 ONLY)

The objective of the literature critique paper is for you to think critically and independently about cognitive neuroscience research and communicate your ideas effectively. You will carefully read one of the pre-selected empirical articles (available on Canvas), briefly summarize it, critique the methods and conclusions, and propose a thoughtful follow-up study. Papers should be 4-5 double-spaced pages. Additional information about this assignment will be provided in a separate handout. **Your literature critique paper is due on Canvas on Friday, OCTOBER 20.** Late papers will be penalized one letter grade per day late.

### Research Proposal Paper (Graduate students enrolled in PSY 549 ONLY)

The research proposal will allow you to explore a research topic related to cognitive neuroscience in depth and propose a novel experiment to address an unanswered question. The proposal should include a literature review (going beyond the readings discussed in class), experimental design, predicted results, and a discussion of the study's implications. Research proposals should be approximately 10-12 pages (double-spaced) in APA format and include at least 10 references. More details will be provided in a separate handout.

### **Grading**

Final grades in this course will be determined by the following:

- ◆ Participation: 10%
- ◆ Quizzes: 15%
- ◆ Midterm: 25%
- ◆ Critique Paper: 12.5%
- ◆ Case Study: 12.5%
- ◆ Final Exam: 25%

Grades will be distributed as follows:

		B+	87-89.9%	C+	77-79.9%	D+	67-69.9%
A	>93%	B	83-86.9%	C	73-76.9%	D	60-66.9%
A-	90-92.9%	B-	80-82.9%	C-	70-72.9%	F	0-59.9%

Please see the psychology department guidelines for a description of the type of achievement that each grade signifies: <http://psychology.uoregon.edu/courses/departement-grading-standards/>

### **Class Policies**

#### Classroom Behavior

Please arrive on time for class, and stay for the duration of the class period. Turn off cell phones and any electronic devices that might be distracting to others. I support and value diversity, and expect you to respect the diversity of backgrounds, opinions, and viewpoints of your classmates.

#### Academic Integrity

**All work submitted in this course must be your own.** Violations will be taken very seriously and are noted on student disciplinary records. If you have any questions about what constitutes academic dishonesty, please ask! For more information, see the UO website regarding academic honesty at:

<https://uodos.uoregon.edu/StudentConductandCommunityStandards/StudentConductCode.aspx>

For written assignments, you must cite all of your sources. Whenever you refer to an idea that is not your own, whether it is a quotation or you are paraphrasing, you must cite and reference the source. If you are unsure about what constitutes plagiarism, please ask! The UO library website also has a helpful page on avoiding plagiarism: <http://researchguides.uoregon.edu/citing-plagiarism>

#### Accessible Education Center (AEC)

If you have a documented disability and anticipate needing accommodations in this course, please notify me as soon as possible. Also, please request that a counselor at the Accessible Education Center ([uoaec@uoregon.edu](mailto:uoaec@uoregon.edu), 541-346-1155) send a letter verifying the type of accommodation that is appropriate. For a list of resources provided by the Accessible Education Center, please see <http://aec.uoregon.edu>.

#### Students for Whom English is a Second Language

If you are a non-native English speaker and think you may have trouble in this course due to language difficulties, please see me as soon as possible to make any necessary special arrangements.

### Course Schedule

*\*The course schedule may change, but quiz/exam dates will not change unless absolutely necessary.*

Week	Date	Topic	Reading to complete before class	Quizzes/Assignments
1-A	9/26/17	Course introduction & methods intro	N/A	Getting to know you
1-B	9/28/17	Cognitive neuroscience methods	Coltheart (2001), Dobbs (2005), <a href="http://www.pbs.org/wnet/brain/scanning">www.pbs.org/wnet/brain/scanning</a> , Sacks Ch. 15, Semendeferi et al. (2002)	Discussion Q1. Due by 7pm each Wednesday except where noted.
2-A	10/3/17	Object recognition	Peissig & Tarr (2007)	Quiz 1
2-B	10/5/17		Sacks Ch. 1, Gauthier et al. (2000)	Discussion Q2
3-A	10/10/17	Attention	Driver (2001), Corbetta & Shulman (2002)	Quiz 2
3-B	10/12/17		Sacks Ch. 4 & 8, Neville et al. (2013)	Discussion Q3
4-A	10/17/17	Memory	Squire & Wixted (2011)	Quiz 3
4-B	10/19/17		Sacks Ch. 2, Squire et al. (2010), Race et al. (2011)	Discussion Q4
4-C	10/20/17	<b>FRIDAY - PAPER DUE</b>	N/A	<b>*Critique paper due*</b>
5-A	10/24/17	Hemispheric specialization	Gazzaniga (2000)	no Quiz
5-B	10/26/17	<b>MIDTERM</b>		<b>*Midterm*</b>
6-A	10/31/17	Language	Martin (2003)	Quiz 4
6-B	11/2/17		Sacks Ch. 9, Bedny et al. (2012)	Discussion Q6
7-A	11/7/17	Cognitive control	Miller & Cohen (2001)	Quiz 5
7-B	11/9/17		Sacks Ch. 13	Discussion Q7
8-A	11/14/17	Decision making	Ophir et al. (2009), Ruff & Fehr (2014)	Quiz 6
8-B	11/16/17		Sacks Ch. 19, McClure et al. (2004)	Discussion Q8
8-C	11/17/17	<b>FRIDAY - PAPER DUE</b>	N/A	<b>*Case study due*</b>
9-A	11/21/17	Emotion	Phelps (2006)	Quiz 7
9-B	11/23/17	THANKSGIVING HOLIDAY	THANKSGIVING HOLIDAY	none
10-A	11/28/17	Emotion continued	to be determined	No quiz. Discussion Q9 due date noon on Tues (not Thurs)
10-B	11/30/17	Recap & review	Study guide	none
11	12/7/17	FINAL EXAM - 12:30 - 2:30 Thursday		<b>*Final exam*</b>
