Name: ____________________________________________

Directions:

• There are 60 available points on this exam.
• You may use a calculator, a writing utensil (I strongly suggest that you use a pencil), and a single notecard; you need to keep your desk clear of any other items. Such prohibited items include cell phones, notebooks, and food or beverage.
• Please ask questions if anything is unclear.
• Be sure to show all of your work. (You do not need to show any work on the true/false questions.)
• Be sure to simplify all of your answers unless otherwise instructed; this includes functions, fractions, and radicals.
• Scratch paper is provided at the end of this exam. Do not put any anything that you want graded on the scratch paper unless absolutely necessary and in that case be sure that you clearly indicate where I can find your answers. Do not tear any page out of this exam which contains work that you want to be graded. If you need additional scratch paper, you can come ask for it.
