

**5 February 2004\_Motion 2**  
**Undergraduate Council Action**  
**Proposal for Mathematics and Computer Science (MACS) Pre-Major**

Now, students are classified as Mathematics or CIS majors before admitted to the MACS major. CIS would like to institute a pre-MACS classification that is analogous to the pre-CIS classification, and intended to include that request in the original proposal to the Undergraduate Council for a pre-CIS major (November 2000). The formalization of the pre-MACS classification will ensure that students have the flexibility to transfer between the majors and will facilitate access to CIS courses by students planning for the MACS degree.

The motion to adopt the proposal was passed unanimously.
