Hi everyone!

Good meeting with wonderful weather! Welcome to those who just recently signed up to hear about geology club! Come to our meetings at 5:30 PM on Wednesdays – we would love to meet you! (If you believe you have received this email in error, just let me know and I’ll take you off the list). We have a lot of great things coming up, so without further ado, the minutes!

**Pancake Breakfast:** The pancake breakfast to thank our awesome department is THIS FRIDAY!!! It will be from 9 AM to 12 PM, show up at 8:30 if you want to help set up. Hopefully, this time we won’t blow a fuse.... ;)

**Structure Field Trip:** Marli Miller is offering 4 open spaces in the vans going on the Structural Geology class’s field trip to Death Valley. She’s giving preference to people who were in structure last year, and then to people who are in the geology club. If you’d like to come but there are no more spaces in the vans, you are welcome to carpool in personal vehicles. The cost for the trip is $60 which covers food, campsites, and transportation (this might come out different if you’re driving your own car). The trip will leave the afternoon of April 22nd and get back either very late Monday April 26 or very early Tuesday April 27th. Marli is trying to solidify plans this week, so contact her (millerm@uoregon.edu) ASAP if you want to come!

**Ultimate Frisbee:** The geology department has its own rockin’ (sorry, couldn’t resist...) ultimate Frisbee team – the Supervolcanoes! Mike Darin is helping to head the team, and he wanted us to know that the team is still open for any would-be frisbeans! There is a sign up sheet by the mailboxes in the front office of Cascade; if the sheet is full just write on the back. All skill levels are welcome – you just need to love playing Frisbee! The first practice is this Friday at 5 at the turf field by Hayward field. There will be 4 games starting in about 2 weeks.

**Recruiting:** We got lots of interested people from the GEOL 103 class! If you’re in a geology class, take a few minutes to stand up and talk about geology club. There are fliers in the club room for you to hand out. Let’s keep the club going – everyone is welcome!

**Grand Canyon:** Brian is finishing up Grand Canyon interview this week – he’ll be in the club room from 3:30 to 4:30 tomorrow (Thursday) and from 12 to 2 Friday, so if you haven’t already, stop by and tell your story! Please also send him your photos of the trip!

**Community Outreach:** Sammy couldn’t make it to the meeting today, but he did send me a sign-up sheet of upcoming events. Many people volunteered to give talks at Emerald Valley Living Center, and we still need some people to help present a lab at the John Serbu Youth Campus on May 6th. I’m attaching the sheet so you can see what’s coming up; email me or Sammy if you want to sign up for anything.
Seismic Presentation: I, Patricia, will be presenting on the research I did this summer as part of a seismology internship with IRIS. My talk is called “Investigating Low Frequency Impulsive Events at Slumgullion Landslide.” I'm presenting a poster on my work at the Seismological Society of America meeting, so this is my chance to actually sit down and get it together! As such, we'll be meeting in Cascade 200, the conference room, next week.

Mt. St. Helens: Kathy Cashman wants us to transform the ground floor of Volcanology into an exhibit on the May 18 eruption to try to draw people into the building so they can learn something about geology and our department. Molly is in charge of planning this, so give her your ideas. Also, Kathy will be coming to our meeting on April 21 to brainstorm ideas with us. This is a great way to share our amazing department with the rest of the school!

Bake Sale: Our next bake sale will be Tuesday, May 4th. I'll send around a sign-up sheet when we get closer to the day.

Movie Night: We're going to start weekly doing movie nights at some point, probably after geology club at about 8:30 PM. Location will depend on how many people we have. More details to come.

Elections: We'll be having elections on week 6. The positions will be president, secretary, treasurer, community outreach, and possibly also a webmaster position.

Tutoring: If you want to be added to the tutoring list on our club website, email Aili (agusey2@uoregon.edu) your tutoring information.

Debris Flume Field Trip: Dick Iverson of the USGS has invited our club to come view the experimental debris flume on Thursday May 27th. This is a chance to view super cool geological research in action! Mark your calendars!

Prineville Field Trip: Allison is working on setting up a field trip out to the Prineville area to see the Wildcat Caldera and a really cool landslide with Carrie Gordon of the Forest Service. More details to come!
See you all next week!
~Patricia
