Hi everyone!

Great job on the bake sale! We made $190 total. Thanks to everyone who helped out!

**Baja Presentation:** Sammy will be presenting on the recent Baja California earthquake next week, so we’ll be meeting in Cascade 200.

**Ochoco Trip:** The trip out to the Ochoco National Forest is this weekend! They’ll be leaving at about 5 PM on Friday, getting back around 7-8 PM on Saturday. If you want to go and weren’t at the meeting, email Dave (blackwel@uoregon.edu) ASAP.

**Mount St. Helens trip:** As of Wednesday, we had two slots left. If you want to go on the trip, email Brian (bleonard@uoregon.edu) ASAP! This is a department funded trip up to Mt. St. Helens to take a field trip led by Kathy Cashman. If you can go it will be an awesome opportunity!

**Slideshow:** I’d like to put together a slideshow for the end of the year. By that time Brian may also have finished his video, so we might get to have a hurrah what a great year meeting/party thing. To that end, send me your photos of you at geology club events! Pictures of geology people are best, but incredibly awesome geology pictures are cool too, obviously!

**Elections:** They’re coming up! We’ll be nominating people next week, and voting the week after that. We will be holding elections for 5 positions: President, Secretary, Treasurer, Community Outreach Person, and Webmaster. Get involved to make the awesomeness of geology club possible!

**Mount St. Helens Exhibit:** This was the big thing at yesterday’s meeting. We will be putting together an exhibit on Humans and Volcanoes on the ground floor of Volcanology for the 30th anniversary of the 1980 eruption of Mt. St. Helens. On May 18, the day of the eruption, we’ll start the day by setting off Diet Coke and Mentos on the roundabout outside of Volcanology! We’ll also have people at the exhibit to show people around and answer questions.

**Exhibit:** The exhibit will feature a movie about Mt. St. Helens running continuously, a guest book where people can leave their stories about Mt. St. Helens, and several posters on different topics.

**Posters:** Thank you so much to those of you who signed up to do posters! We really need your help to make this a great thing! We have 7 posters total (Kathy is making one). We’ll print out the posters on a plotter, so they’ll look like conference posters, but don’t worry, they don’t have to be that detailed! Instructions for making posters in Powerpoint:
1. Open Powerpoint (generally a good first step)
2. Open “Page Setup” under “File”
3. There should be a section for size. Set one of the dimensions to 42 inches. The other
dimension can be anything you want (within reason). One of the dimensions has to be 42 inches, since the plotter paper is 42 inches wide. A good size is 36" by 42".

4. Make your poster!
5. Send your poster to me and Molly (mkeogh@uoregon.edu) via email by the next club meeting. We’ll edit the posters after the meeting and have them ready to print the next day.

**POSTERS SHOULD BE DONE BY MAY 12!!!**
I’m attaching charts for who signed up for posters and shifts to this email. Thank you so much for volunteering – this is going to be awesome!

~Patricia
