

The AWM Distinguished Speaker Series presents

Nancy Scherich

Elon University

How do Mathematicians Study Braids?

Abstract:

Knots and braids are all around us, and believe it or not, they are very mathematical! In this undergraduate introductory talk, Dr. Nancy Scherich will describe how mathematicians build a model for braided objects and how we study this model. As both a mathematician and award winning dancer, Dr. Scherich will use dance videos as visual aids to explain the higher math concepts.

Thursday, June 1st, 2023
3-4pm in 205 University Hall

Everyone is welcome to attend this talk for all levels hosted by the UO Student Chapter of the Association for Women in Mathematics
