

GTF: Tobin Newburgh

- 3" Wall
- 6" Wall
- 9" Wall

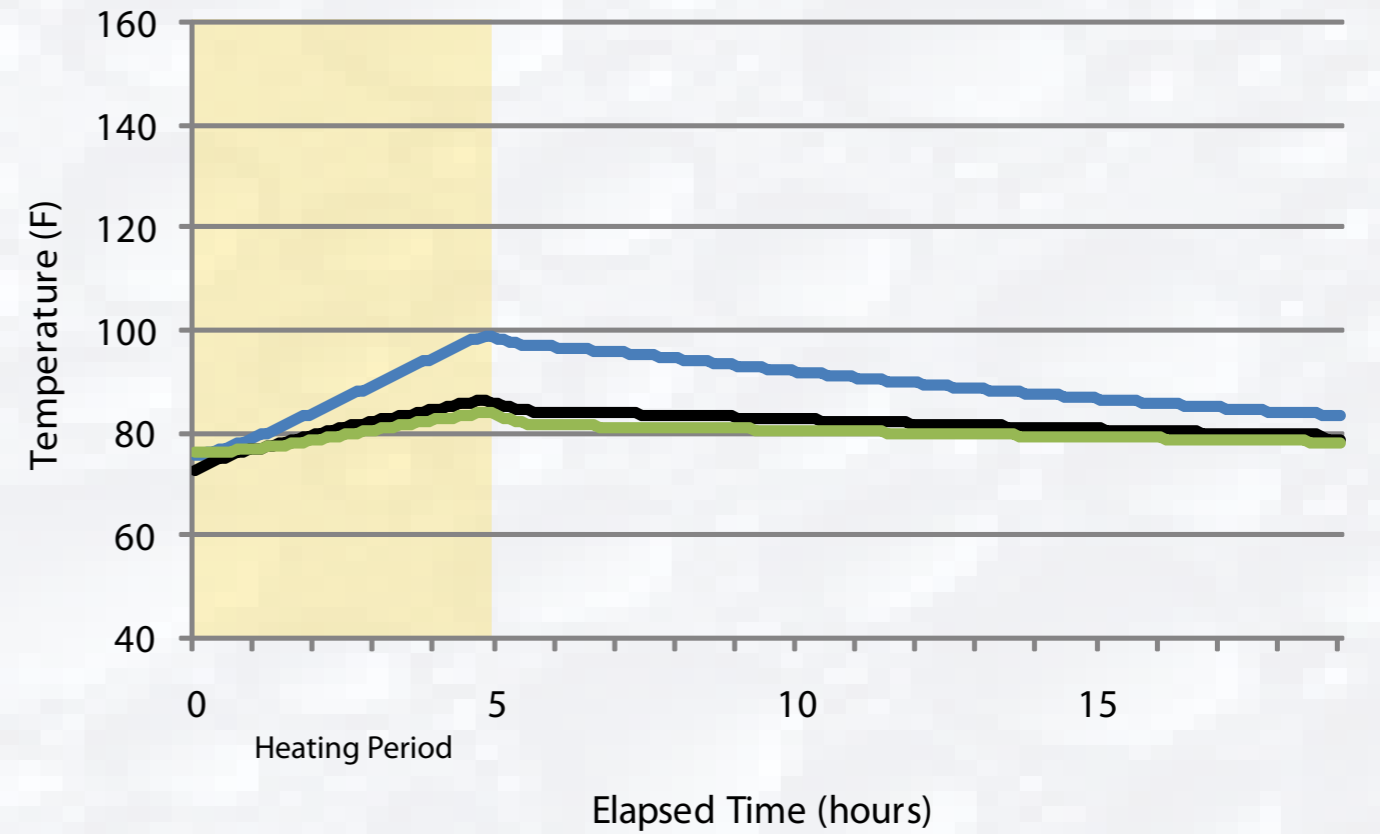

Analysis of data

Temperature of "Outside" Box

Temperature of "Inside" Box

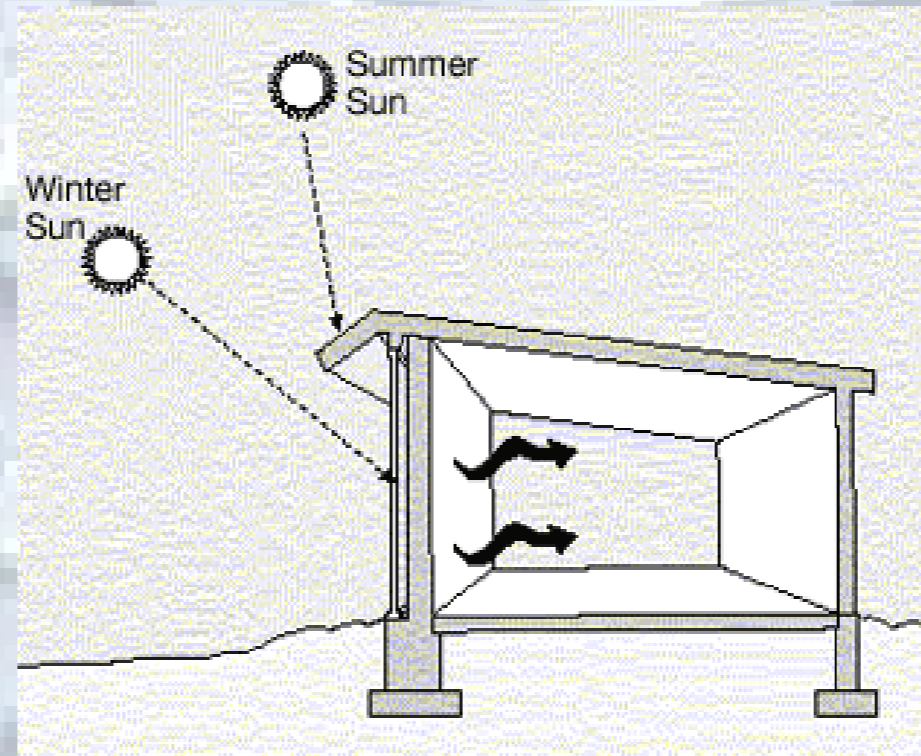

Not a Dry Subject: Water Wall Thickness

Serina Adams, Marc Becker, Caitlin Gilman, Drew Krauss

Aesthetic Considerations

Environmental Considerations

Hypothesis:

For every three inch increase of a water Trombe wall, there will be an increase of .2501 (ratio of outside temperature to inside)

Construction
