

The Eugene Natural History Society

Presents a Free Lecture:

Historical and Projected Patterns of Change in Pacific Northwest Streams: Implications for Persistence of Threatened Bull Trout

Upper Reese Valley, in northeastern Nevada, where flows the Reese River, home to the southernmost populations of Lahontan cutthroat trout, which Dunham studied for his Ph.D. and continues to study now.

**Dr. Jason Dunham, Supervisory
Research Aquatic Ecologist, U.S.
Geological Service, Corvallis, Oregon**

Friday, 17 May 2013

7:30pm, Room 100 Willamette Hall, UO Campus
