

Name_____

1. Write down a 1-2 sentence summary of what you want to communicate with your presentation.

e.g., I want to present a model for Siletzia accretion and relate this to the ending of the Laramide and the beginning of the Ignimbrite flareup.

2. Sketch and describe 3 figures that develop your goal. Think of these as preliminary figures for your presentation.

e.g., Three time frames for (a) before, (b) during and (c) after Siletzia accretion.

a. flat-slab subduction; North America contraction; no magmatism

b. initial Cascadia subduction; initial Siletzia rollback;

vigorous North America extension; vigorous North America volcanism

c. Cascades; tectonic and magmatic quiescence in Challis area; dangling slab

Present your Summary and explain your 3 figures to the members of your group, or team up with another group if your group is doesn't exist.
