

Math 112—HW 6 Rubric

Greg Knapp

May 15, 2018

The homework consisted of the following problems

- 2.6A (1–4, 6, 7)
- 3.1A (1–4, 6, 10)
- Extra credit: 3.1A.11

Section 2.6A

1. 7 points. 1 point for each part, graded on accuracy.
2. 6 points. Same as 1.
3. 2 points. 1 point for showing some work, 1 point for correctness. Note that some students may give their answer in radians, which should still receive full credit.
4. 2 points. Same as 3.
6. 3 points. 1 point for showing some work, 1 point for making some progress, the final point for correctness.
7. 3 points. Same as 6.

Section 3.1A

1. 7 points. Half a point for the exact form, half a point for the decimal approximation in each part.
2. 7 points. One point for each part, graded on accuracy.
3. 3 points. One point for each part, graded on accuracy.
4. 2 points. 2 points for each part: 1 point for making progress, 1 point for the correct answer.
6. 2 points. Same as 4.
10. 2 points. One point for progress, one point for the correct answer.
11. (extra credit) There are 4 possible points. 1 point for showing some work (beyond just redrawing the picture), 1 point for some kind of progress, 1 point for significant progress, but maybe a minor error, and the fourth point for a correct answer.
