

Amani Finding Guide
October 2008

Notes:

- In this cabinet you will find many materials related to the East African Institute for Malaria and Vector Borne Diseases, including the Pare/Taveta Malaria Scheme, consultations on malaria programs in EA, and work on schistosomiasis and filariasis. There are materials pertaining to all three EA countries, in addition to the work of the WHO in the region. Materials are mostly focused on the 1950-60s.
- I've listed the titles of each folder in the boxes in this cabinet. I've sometimes shortened disease names (such as 'oncho' for onchocerciasis or 'schisto' for schistosomiasis). The number in brackets [4] after the file names refers to number of folders in that box with the same name. When there is no cover to the folder, I've put in (parentheses) the general topic of the folder.
- I've numbered the boxes as 1-24. '1' is in the top left corner when you are facing the cabinet, box '4' in the upper right corner, and box '24' is in the bottom most right corner.
- If you have more specific questions about these materials, you can email me, Melissa Graboyes at graboyes@bu.edu.
