Here is my mark-up of the current drawings with potential VE/Alternates:

1. Kitchen/Break area roughed in with no casework or plumbing
2. All interior glazing – not doors – will be plastic corrugated
3. Middle “Phone Booth” will be eliminated
4. Front Entry canopy is not included in base

Also – a couple of things I noticed that still need to be changed:

1. The shelving in the kitchen and the copier area need to be removed.
2. The roll up door in the design studio exterior will need to be replaced with a built in place wall with some window component
